OS: Windows 7 SP1 or newer

Processor: Dual Core Processor or better

Memory: 2048 MB RAM

Graphics: NVIDIA GeForce GT 520 MX 512 MB or equivalent

Storage: 1024 MB available space

English

Sometimes too much gore, but its really exciting.. 10 unity platformers out of 20.. [Linux Review]

0.2 Hours is all i played, The game is very boring, Leader board is broken on Linux (as in my score did not go up), game is to Dark in places and cannot see monsters, gun line up with mouse is hit or miss (Mostly Miss), Weapon swapping with keys 1 to 4?, in the year 2018 i would like to use my Mouse Wheel, 1 Map\Level (Very small), It did run at 60fps (v-sync on) which is good.

I was hoping it was more like the run and gun games from the 90's (Abuse\Metal Slug for example), with big levels and lots of Levels to play, but this is way off, more like a small survival game with random gun line up.

Sorry but i cannot recommend this game even at the \u00a330,84 sale price, Better off playing Abuse for free.

UPDATE: Some things are fixed now, Mouse wheel to change weapons, Level is a little bigger now but still only one very dark level, A teleport pad that seem random to where your end up, New monster??, A bigger Red Zombie?? And a Red crab\spider thing so not really new monsters, Still random shooting line up, Online leader board seems fixed, Still cannot recommend this game.. nice remake of crimsonland with interesting changes. for this price is good enough to spend some time. i hope the game will evolve and more levels come up, updates are quite often now.
